HIGHER LEARNING COMMISSION

MULTI-CAMPUS REPORT

SEPTEMBER 2024

Eastern Iowa Community Colleges

Multi-Campus Report

Introduction

Eastern Iowa Community Colleges (EICC) was formed in 1966 through the merging of Clinton, Muscatine, and Scott Community Colleges. The well-established Muscatine Community College (MCC) and Clinton Community College (CCC) recognized the need to forge a unified three-college approach, leading to the creation of EICC. By the mid-1980s, EICC was fully transitioned, and accredited, as a district, streamlining operations and enhancing educational consistency.

EICC's mission is to "deliver high-quality education and training that prepares a skilled workforce, provides equitable access to higher education, and builds and strengthens our communities." To best fulfill its mission, the college balances consistency in policies, program alignment, and oversight with a strong respect for the individual needs of each community. This enables EICC and each campus to provide effective services, efficient operations, and impactful opportunities for students and the region.

Clinton Community College

The CCC main campus is centrally located in Clinton, Iowa, and serves students from Clinton and Jackson counties, as well as surrounding communities. Established in 1946 to support World War II veterans, CCC has grown significantly and now educates over 2,400 students annually. The campus offers a comprehensive range of face-to-face, hybrid, and online classes with affordable tuition, ensuring accessibility and flexibility for all learners.

CCC students receive an interactive education. Faculty and staff provide a supportive environment, guiding students throughout their education. The renovated library is equipped with quiet study rooms, a modern art gallery, and extensive resources. The student center is a hub for socializing, studying, and campus and community activities. Additionally, CCC features courtyards and an auditorium.

Located on the CCC main campus, the newly constructed, 26,700 square-foot Clinton Career Advancement Center is designed specifically for Career and Technical Education (CTE) programs. It was built with strong community support, following a successful $40 million bond referendum passed by more than 70% of district voters in March 2021. The $9 million center opened in 2023 and now provides CTE programs that align with the needs of regional businesses and provide a pipeline of skilled talent for local industries.

The center also hosts high school Career Academies, providing juniors and seniors the opportunity to explore careers, develop workforce skills, and earn college credits at no cost. The Career Academy programs were chosen based on input from businesses, industries, and commitments from K-12 partners.

CCC extends its educational programs to the Maquoketa Center, DeWitt Career Advancement Center, and the Bickelhaupt Arboretum, ensuring that students have a wide range of high-quality academic programs across various locations.

Muscatine Community College

Muscatine Community College (MCC) serves over 2,043 students annually. The remodeled main campus features classrooms and labs, fine art performance spaces, student hangouts, and more. Dedicated faculty and staff support academic and career goals through services including advising, tutoring, career guidance, and student activities and organizations.

Located on the MCC main campus, the Muscatine Industrial Technology Center is training the manufacturing workers of today and tomorrow. The center holds fully equipped labs and classrooms tailored to hands-on instruction in engineering technology, hydraulics, pneumatics, electricity, programmable logic control, and robotics. The curriculum, developed with input from local employers, aligns with industry needs, providing students with relevant workforce skills.

The Muscatine Career Advancement Center was a significant addition to the MCC campus. A successful $40 million bond referendum passed in March 2021 made its construction possible. The facility is dedicated to CTE programs, including Career Academies that allow high school juniors and seniors to explore careers, build workforce skills, and earn college credits at no cost. The programs are aligned to the needs of business and industry, and just one year after opening, the center is skilling talent for numerous industries.

Student housing enhances the college experience for many MCC students. On-campus student apartments provide a safe and comfortable living environment and foster community among students. With modern amenities, dedicated study areas, and social activities, MCC student housing supports academic success and personal growth. While living on-campus, students can become fully immersed in college life, build lasting connections, and take advantage of all the resources MCC offers.

MCC classes are also available at the Muscatine Agriculture Learning Center, Button Factory, Columbus Junction Center, West Liberty Center, and Wilton Center. This wide reach ensures that students, wherever they are located, can access MCC's high-quality education and support services.

Scott Community College

Scott Community College (SCC) has been an essential pillar supporting the Quad Cities region for the past 60 years, which is reflected in its growth. SCC currently serves over 7,000 students annually and the main campus has doubled in size over the past 15 years. The contemporary facilities support learning and collaboration. The central building is a two-story hub equipped with state-of-the-art labs, classrooms, vibrant student commons, a student services wing, and a fully equipped library.

The SCC main campus is intentionally designed. A career and technical education building provides hands-on training, while a new Health Sciences Center, a product of the 2021 $40 million bond referendum, provides cutting-edge learning facilities for nursing, dental, surgical tech, medical assisting, and CNA students. The center is equipped with innovative technology and patient simulators, ensuring students are well-prepared for their future careers. Each year, over 350 students graduate from EICC healthcare programs, with the majority remaining in the region to work in local hospitals, clinics, and healthcare services.

The Culinary Arts Center, also located on the SCC main campus, has shaped the careers of countless culinary professionals. The 10,000-square-foot facility features an instructional lab with top-of-the-line equipment, a dedicated baking lab, and an outdoor area with a woodfire pizza oven, meat smoker, and commercial grills. These facilities provide students with a comprehensive culinary education, from the classroom to the kitchen garden.

In addition to instructional facilities, SCC has invested in student services and spaces. A recent project, funded by EICC, included constructing a larger entrance, new student commons area, and centralizing student services. Students can now access essential services more easily and enjoy a dedicated space for studying, meeting with advisors, or relaxing between classes.

SCC continuously collaborates with local businesses and K-12 partners to address workforce needs and enhance educational opportunities. The focus on providing high-quality programs and services ensures that students are well-equipped to achieve their goals and contribute to the region's growth.

SCC's reach goes beyond the main campus. It offers classes and training at the Blong Technology Center, Urban Campus, and West Davenport Center. In any of these locations, students can collaborate with peers, meet with an instructor, or engage in extracurricular activities, clubs, and community service.

Governance and Oversight

Eastern Iowa Community Colleges (EICC) encompasses Clinton Community College, Muscatine Community College, and Scott Community College. Each campus operates under a common governance and administrative structure to ensure consistent oversight and quality across the district. The governance framework is anchored by the Board of Trustees, which includes members from various districts to ensure comprehensive community representation. This structure is mandated by Iowa Code 260c and detailed in Board Policy 203.

The Board of Trustees sets and executes policies informed through a collaborative process involving the Chancellor, Senior Leadership Team, Leadership Council, Academic Leadership Council, faculty, staff, students, and community stakeholders. Policies undergo a thorough review every three years, ensuring they align with community interests and support strategic planning.

Administrative Structures

EICC operates three campuses—Clinton, Muscatine, and Scott Community Colleges—by aligning academic programs, assessment practices, student supports, and services under a unified framework. Standard policies and procedures, including board policies, catalogs, handbooks, and employee requirements, ensure consistency across all locations. Operations are conducted collaboratively, promoting efficiencies and shared resources while respecting the unique characteristics of each campus

Variations in operations reflect the size and differences among campuses, and each campus has its own budget to address specific local needs. Each has its own college foundation which allows for targeted fundraising and community connections specific to the counties served. This structure fosters strong community ties and ensures that local needs and priorities are effectively met. By leveraging the strengths of each campus and fostering collaboration, EICC ensures high-quality education and support services across its entire network.

The Chancellor collaborates closely with the Board and aligns decisions with state and federal initiatives to ensure the college's strategic direction supports broader regional goals. Each college president plays a pivotal role in fostering community connections with K-12 schools, business, and industry partners. The presidents, along with campus leadership teams, actively serve on community and economic development boards, and meet with community and stakeholder groups.

Their involvement in various organizations helps align the college's educational programs with the workforce needs of the community, ensuring that students are prepared for local job markets. This tiered and strategic engagement enhances educational outcomes and strengthens the college's role as an essential community partner contributing to the region's economic and social vitality.

EICC's collaborative operations across its three campuses, combined with active community engagement by college presidents and leadership teams, create a robust and responsive educational environment. This ensures consistency in quality and support services while leveraging the unique strengths of each campus and its community. EICC's oversight, quality standards, and consistency ensure students receive a high-quality educational experience across all campuses. This unified approach fosters deep community relationships, assists with retention and student success, and addresses community-specific economic and societal needs.

Educational Offering and Continuous Improvement

EICC's commitment to educational quality is demonstrated through robust planning, resource allocation, evaluation, and continuous improvement. The College employs systematic evaluation mechanisms, including program reviews, student feedback, and accreditation processes, to ensure high educational standards and outcomes. Regular program reviews, conducted every four years as mandated by Board Policy 613, encompass both Arts and Sciences disciplines and Career and Technical Education (CTE) programs to ensure alignment with educational goals.

CTE program review is integral to EICC's quality assurance processes. These reviews are thorough and data-driven, involving faculty and staff in evaluating course content, standards, and outcomes. The reviews foster communication among faculty, promote data analysis leading to curriculum updates, and identify new instructional approaches. The General Education review is similarly comprehensive, with a subcommittee examining success rates and alignment with transfer agreements to ensure courses meet the needs of students and the wider educational framework.

EICC uses an array of instructional delivery methods to meet the varied needs of students. Traditional classroom instruction, online learning, and hybrid models provide flexible and accessible education. Each campus has dedicated facilities and resources to support these instructional methods, ensuring all students can succeed regardless of their learning preferences.

The three campuses operate academic programs under the same college catalog and approved curriculum. The Course Development Model (CDM) ensures consistent delivery of course outcomes and standardization of curriculum across all campuses. The CDM outlines the structure and content of each course, including titles, credit and contact hours, prerequisites, descriptions, and learning outcomes. This model ensures that the same high standards are maintained whether a course is taught in-person, online, or in a hybrid format. It guarantees that students receive the same quality of education and meet the same academic benchmarks, regardless of the delivery method or location.

Program reviews ensure every location upholds the same academic standards. The process involves evaluating course content, student outcomes, and feedback from all campuses. The Educational Programs, Policy, and Curriculum Council (EPC) maintains academic rigor. Comprised of faculty, staff, and curriculum experts, EPC reviews and approves all new courses, modifications, and program developments. The members ensure the curriculum meets academic standards, industry expectations, and delivers a high-quality education.

Divisional Deans manage programs and faculty across the three colleges. They ensure academic programs are delivered consistently and effectively, coordinating efforts across campuses and supporting faculty in their teaching and professional development. This management structure supports EICC's mission to provide high-quality education and maintain academic integrity across all its locations.

Academic programs reflect the workforce and economic demands of the communities. The college campuses have led the development and oversight of signature programs:

- **Clinton Community College:** Graphic Arts was developed at CCC in the mid 1990's in response to the area's growth within printing manufacturing. As the industry evolved, the program changed its focus from press operation to design, and now to digital based design. During the COVID-19 pandemic, the program shifted delivery to fully online, which expanded access and increased enrollment and retention. EICC supports labs with the appropriate technology at all three college campuses to ensure graphic design students have equitable access to the costly technology.
- **Muscatine Community College:** Agriculture programs have been a foundation on the Muscatine campus since 1966. The programs feature paid work-based learning experiences so students can "earn while you learn." Faculty encourage students to participate in campus clubs, live in student housing, and join international trips focused on agriculture. The program is currently expanding into Career Academies and will be offered in DeWitt and Eldridge.

- **Scott Community College:** As the largest campus serving the largest community, SCC leads the Health Sciences programs for EICC with Dental Assisting, Radiology Technology, Surgical Technology, Sonography, Health Information Technology, Cancer Information Management, Medical Assisting, Nursing, and Certified Nurse Aid. Three of the programs - Nursing, CNA and Medical Assisting - are offered at locations across the district. However, students pursuing healthcare careers can get their start at any of our locations through Health Career Academies and guided pathways. These new Health Career Academies give high school students the opportunity to begin their college education while exploring careers in healthcare. EICC's investment in healthcare programs is evident in the newly renovated Health Sciences Center and the new nursing labs at MCC and DeWitt.

These represent a few highlights; a full list of academic programs by location is included below.

Course schedules are developed via a collaborative process with faculty, department coordinators, divisional deans, concurrent enrollment dean, and the dean of online learning. In FY2019, 34% of EICC credit hours were delivered online through a partnership with ICCOC. The well-developed course content and the online structures played a critical role in the college's transition to remote learning during the COVID-19 pandemic. Shifts in student preference and schedule balance continue to be evaluated. The colleges continue to bring more classes back to campus while some academic offerings

have shifted to online delivery. Examples included Graphic Arts, Information Technology, and American Sign Language Interpreting. In AY2024, 47.9% of credit hours were delivered online with 62.7% of students enrolling in at least one distance course.

Resource Allocation and Staffing

Resource allocation at EICC is strategically managed to support institutional goals and priorities. A collaborative budget planning process involves input from various levels of the college, which ensures transparency and alignment with strategic objectives. Individual college presidents oversee campus-specific budgets, enabling them to respond to location-specific needs and priorities.

Staffing at EICC is meticulously planned to meet the unique needs of each campus. This approach allows each campus flexibility to address specific academic and operational requirements. Staffing needs are reviewed at the district and at the campus level, providing a comprehensive assessment for resource allocation.

Balancing staffing is a delicate process, and smaller sites often take the lead on district-wide projects. This is a collaborative approach that maximizes the use of available talent and expertise. With the recent expansion of Career and Technical Education (CTE) programs to Clinton and Muscatine, more faculty positions are being shared across campuses as these programs build enrollment. This is efficient and effective. The continuity of faculty members helps establish and stabilize new program sites.

Each college within EICC has its own foundation, which uses fundraising to address specific community needs. These foundation funds support student scholarships, program advancements, and facility improvements. Additionally, individual campuses actively seek local and regional grants to further enhance their educational services by targeting specific community needs.

- **Clinton Community College – Paul B. Sharar Foundation:** This foundation has provided match funding for grant-based facility improvement projects, including renovations of the Library, Rooms 116, 150, and 154, the Learning Center and the Bickelhaupt Arboretum. It also funds specific equipment and projects for various departments, including the CCC Leadership Development Program for area students. Annually, the Sharar Foundation awards over $200,000 in scholarships to students.

- **Muscatine Community College Foundation:** Through its relationship with the Roy J. Carver Trust, the foundation has secured funding for the Loper Hall renovation, the Virtual Reality Lab, high fidelity allied health simulators, equipment for the campus food pantry, and Anatomage tables. Through a partnership with the Community Foundation of Muscatine, the scholarship application process was streamlined, increasing student access to college foundation and community-based scholarship funding.

- **Scott Community College Foundation:** The foundation hosts the annual SCC Bash, a fundraising event that has boosted scholarship funds and provided community exposure for the Culinary Arts program. The foundation also played a crucial role in securing community support and grants for the 2018 SCC Urban Campus project.

Infrastructure Planning: Facilities and IT

At EICC, planning for facilities and information technology (IT) infrastructure is a collaborative process involving the senior leadership team, campus leadership, the district facilities director, and the chief information officer. Each campus shares its specific needs for facilities, technology, classroom, and laboratory equipment. This ensures that planning is responsive to district-wide objectives and the specific requirements of each campus.

The vice chancellor of academic affairs, vice chancellor of student development, and the vice chancellor for workforce development also contribute to these discussions, ensuring a balanced approach that addresses college-wide needs while prioritizing high-need areas at individual campuses. This allows EICC to effectively allocate resources, enhance educational environments, and support student success across all locations.

Community-specific needs are carefully considered in the planning process. A noteworthy example is the 2021 bond levy, which resulted in significant enhancements across EICC campuses:

- **Clinton Community College:** Added a Career Advancement Center featuring programs in Auto, Welding, Agriculture, and Culinary Arts. This center addresses local workforce demands and provides students with modern facilities and equipment to enhance their learning experiences.
- **Muscatine Community College:** Developed a Career Advancement Center with a focus on Nursing, Criminal Justice, Auto, and HVAC programs. These additions are tailored to meet the specific needs of the Muscatine community.
- **Scott Community College:** Created a Health Science Center to modernize program labs and classrooms. This project supports the growing regional demand for healthcare professionals by providing state-of-the-art facilities for health science education.

Through strategic infrastructure planning, EICC ensures its campuses are equipped to provide high-quality education and training that meets the evolving needs of its students and the communities it serves. Through this approach, EICC maintains its commitment to excellence in education while fostering strong partnerships.

Student Services

Eastern Iowa Community Colleges (EICC) offers a comprehensive range of student services to support academic success and personal development across its three campuses.

- **Academic Advising:** Academic advising at EICC provides personalized guidance, assistance, and support to help students create comprehensive academic plans that align with their career goals. Advisors meet regularly with students to review academic progress, adjust plans as needed, and provide encouragement. New students attend a mandatory orientation introducing them to various services and resources, setting the stage for ongoing support throughout their tenure.

  The advising model is standardized across all campuses to ensure consistency and quality of service. Regular reviews of advising loads and staffing adjustments help maintain manageable caseloads for advisors. Advisors collaborate regularly across campuses to share updates and develop strategies, ensuring all students receive up-to-date information and consistent support,

fostering a responsive advising environment that promotes student success and lifelong learning.

- **Career Services:** EICC's Career Services department assists students and graduates in preparing for their professional lives. This includes career counseling, job search assistance, resume writing workshops, and interview preparation. Career Services also works closely with local employers to facilitate internships and job placements, providing students with valuable real-world experience.

- **Libraries:** EICC offers comprehensive library services at each campus. These libraries are a vital resource for students, providing access to a wide array of materials and services. Each library offers books, journals, articles, and electronic databases essential for academic research. Students can also access study spaces, computer labs, and expert assistance from library staff who can help with research, locating information, and using various resources effectively.

  The libraries are equipped to support students in health programs like Nursing and Dental Assisting with specialized anatomical models available for study. Additionally, the SCC and CCC libraries feature art galleries that host exhibitions showcasing the work of students, faculty, and community artists.

- **Tutoring and Academic Support:** EICC offers extensive tutoring services on each campus to support student success. The Success Centers provide one-on-one peer tutoring for a variety of subjects and educational needs, and Writing Center tutors offer advice and feedback on writing projects. Tutoring services are flexible and accessible, available in-person and online, ensuring students receive the help they need to understand course material, prepare for exams, and complete assignments. This commitment to academic support highlights EICC's dedication to student success and educational excellence.

- **Disability Services:** EICC is committed to providing equal educational opportunities for all students, including those with disabilities. The college complies with state and federal civil rights legislation and offers reasonable accommodation to ensure that students can fully participate in academic programs and activities. Services include extended time for testing, note-taking assistance, and access to adaptive technology. The college partners with K-12 schools to provide transitional services to students through the ACCESS program.

- **Financial Aid and Scholarships:** EICC offers various financial aid options, including federal and state grants, scholarships, and work-study. Each campus has a foundation that raises funds to support student scholarships, ensuring financial resources are available to those in need. The financial aid process is standardized across Clinton, Muscatine, and Scott Community Colleges, providing consistent services and a uniform appeal process to help students navigate their financial needs clearly and fairly.

  To manage peak times, EICC leverages staffing from Clinton and Muscatine campuses to support Scott Community College, ensuring timely assistance during high-demand periods. The financial

aid office offers comprehensive guidance on applying for aid and managing educational expenses, including personalized counseling and support to help students make informed financial decisions.

- **Record and Registration:** The Records and Registration office on each campus manages student records, including the processing of enrollment, class schedules, grade reporting, and transcripts. Staff ensure academic policies are upheld and students have access to accurate and timely information regarding their academic progress. The office also assists with course registration, adding or dropping classes, and resolving any issues related to academic records. Additionally, they facilitate the transfer of college credits, assist with credit for prior learning, and handle reporting for veterans and military funding. By maintaining a high standard of service, the Records and Registration office helps students navigate their educational pathways efficiently and effectively.

- **Technology and Online Resources:** EICC offers comprehensive technology resources to support students in their academic pursuits. Every campus has Wi-Fi, ensuring reliable internet access for coursework and research. Student computer labs provide access to the latest software and technology. Additionally, the IT Help Desk assists with technical issues such as connectivity problems and general IT support. To ensure equitable access to technology, the college offers loaner laptops and Wi-Fi hotspots available for checkout in the library.

  EICC also provides a range of online tools to enhance the learning experience. BrainFuse offers online tutoring and study resources, allowing students to get academic help anytime, anywhere. ReadSpeaker TextAid supports literacy and comprehension, helping students improve their reading and writing skills. InSpace facilitates virtual collaboration between students and instructors. The Canvas Helpdesk assists students with any issues related to the Canvas learning management system, ensuring effective navigation and utilization of this essential platform. These online tools, combined with the college's technology resources, provide students with the support they need to succeed in their studies.

- **Veterans Services**: EICC provides veterans and military-connected students specialized support services, including educational benefits, counseling, and assistance with VA paperwork. The college ensures that veterans receive the benefits they are entitled to and supports their transition from military to civilian life.

- Student Engagement and Activities: EICC encourages students to engage in campus life through various clubs, organizations, and events. These activities provide invaluable opportunities for leadership development, social interaction, and personal growth, helping students build a strong sense of community and enhancing their college experience. Scott Community College offers men’s and women’s soccer and cross-country teams.

  Each campus creates unique opportunities and student organizations tailored to their specific student population. This approach respects and addresses individual community needs,

ensuring that all students have access to relevant and meaningful extracurricular activities. Examples include LULAC at MCC, the Gaming Club at CCC, and the Black Student Union at SCC.

- **Food Pantries:** EICC provides food pantries on each campus, offering non-perishable food items, personal hygiene products, and other necessities. This support allows students to focus on their studies without worrying about basic needs, fostering an environment for academic and personal success.

- **Mental Health Counseling Services:** EICC is committed to supporting the mental health and well-being of its students. Professional counseling services are available to help students manage personal issues that may impact their academic performance. These services include individual counseling sessions, crisis intervention, and referrals to community resources for additional support. In 2023, EICC added a full-time mental health counselor at the SCC campus. The counselor manages individual student appointments and delivers workshops and content across the district.

Examples of Distinct Campus Services

- **Scott Community College's TRIO Support Services** assist first-generation college students, low-income individuals, and students with disabilities. This federally funded program offers personalized academic advising, tutoring, financial literacy education, and college transfer planning to boost retention and graduation rates. TRIO provides participants with essential tools and resources for a successful educational journey, fostering a supportive community for academic and personal growth.

- **The RISE Program at Clinton Community College** supports students facing educational barriers by offering individualized academic advising, career counseling, mentoring, and life skills workshops. Participants receive a $1,000 stipend for active involvement in these services. The program aims to empower students to overcome obstacles, achieve their education and career goals, and thrive academically and personally.

- **Muscatine Community College's LULAC Student Chapter** promotes educational opportunities for Hispanic and Latino students through academic advising, cultural events, leadership programs, and scholarships. This program fosters a supportive environment, enhancing the college experience by building community and cultural pride, supporting academic success, encouraging civic engagement, and preparing students for leadership roles.

- **Muscatine Community College (MCC) offers student housing** with fully furnished rooms, high-speed internet, study areas, and social spaces. On-campus living fosters community engagement and provides easy access to academic resources and campus events. The housing staff creates a safe, supportive environment with programming that promotes student engagement and personal development, ensuring a conducive environment for students to live, learn, and grow.

These comprehensive services reflect EICC's commitment to fostering a supportive and inclusive educational environment. By addressing the holistic needs of students, EICC ensures that every student has the opportunity to succeed academically and personally.

Summary

"The whole is greater than the sum of its parts." This adage captures the essence of EICC's approach to serving its diverse communities while maintaining a unified regional strategy. EICC's integrated governance and administrative structures ensure consistent standards, resource sharing, and strategic alignment across all campuses. This synergy amplifies the impact of each campus and enhances EICC's ability to deliver on its mission. By harmonizing the individual needs of Clinton, Muscatine, and Scott Community Colleges with a cohesive regional framework, the college ensures that each campus retains its unique identity and strengths while contributing to a larger mission of educational excellence and community enrichment. This balance enables EICC to leverage the distinctive resources, programs, and talents of each campus to provide comprehensive and high-quality educational opportunities across Eastern Iowa.

EASTERN IOWA COMMUNITY COLLEGES
CLINTON ♦ MUSCATINE ♦ SCOTT

THE Community's College

Enrollment and Enrollment Projections

The Fiscal Year Student Enrollment at Eastern Iowa Community Colleges (EICC) is carefully reported and displayed by program award level, providing a comprehensive view of student distribution across the district. Enrollment data is aggregated to show totals by program award level, reflecting the various academic achievements pursued by students. In addition to district-wide totals, the data is broken down by the three main campuses: Clinton Community College, Muscatine Community College, and Scott Community College. This breakdown allows for a detailed understanding of how students are distributed across these campuses in relation to their specific program pathways.

Students are reported under one of the three colleges based on several key factors, including their primary location as indicated on their student application, their program enrollment, and their advisor assignment. This reporting method ensures that each student is accurately attributed to the college that serves as their primary academic home, even if they are taking classes at multiple locations or online. Whether students are attending classes on-campus, at one of the campus's associated locations, or through online platforms, their enrollment is consistently tracked to reflect their connection to a specific college within the EICC system. This approach provides a clear and organized representation of student enrollment across the district, supporting informed decision-making and resource allocation.

Enrollment Fiscal Year 2022-2023

Program	EICC	CCC	MCC	SCC
Accounting Management				
Accounting Management AAS	65	10	16	39
Accounting Management Diploma	44	5	11	28
Additive Manufacturing				
Digital Modeling and Additive Manufacturing Diploma	2	0	0	2

Enrollment Projections

Eastern Iowa Community Colleges (EICC) conducts enrollment projections at the overall program level for the entire district, rather than by individual campus location or program award level. This approach reflects the fluid nature of student progression through program award levels—such as moving from a certificate to a diploma to a degree—and the flexibility of course delivery across locations. For example, students in certain Career and Technical Education (CTE) programs may begin their first year at one campus and complete their second year at another. Additionally, students frequently transition between delivery modes, starting as concurrent students in high school and then continuing on-campus or online. In any given academic year, students may be enrolled in sections at multiple sites or through various delivery methods. To maintain academic quality, EICC provides flexibility in faculty load assignments across locations and exercises right of assignment to ensure comprehensive service coverage. Senior Leadership closely monitors enrollment trends by campus and location, assessing faculty and staffing needs to adapt to these dynamics.

Faculty Teaching Schedule Fall 2024

Clinton Community College
Muscatine Community College
Scott Community College

The faculty listing provided below represents the on-campus teaching assignments by faculty for Fall 2024 at each of our three main campuses. Please note that faculty members may also be assigned teaching responsibilities at various other locations and across different modalities, such as online, high school concurrent or hybrid courses. While the Division Academic Deans have overall oversight of faculty within their respective divisions, ensuring consistency and quality across all locations, the on-site deans at each campus are responsible for providing operational support to all faculty members at their respective locations.

Clinton Community College - Main Campus - Fall 2024 Faculty On-Campus Schedule
