GENERAL NOTES
1. All measurements are approximate and should only be used for planning and design purposes. The actual location, extent, and quantities of elements shown on these drawings are intended for use as construction specifications and should not be used for surveying.
2. All materials, dimensions, and details shown on these drawings are for estimation purposes only and are subject to change without notice. Final dimensions and quantities shall be determined by onsite measurement.
3. The Contractor shall be responsible for the protection of all existing underground utilities, including but not limited to water, sewer, gas, electrical, and communication lines. The Contractor shall ensure that all existing utilities are properly marked and protected as required by law.
4. The Contractor shall be responsible for the installation of all new underground utilities, including but not limited to water, sewer, gas, electrical, and communication lines, in accordance with the specifications and plans provided.
5. All work shall be performed in a safe and workmanlike manner, and all work shall be completed in a manner that is compatible with the existing utility systems. The Contractor shall ensure that all work is performed in accordance with the applicable codes and regulations.

UTILITY NOTES
1. Upon completion of the work, the Contractor shall notify the appropriate utility company to turn off the service to the property. The Contractor shall be responsible for ensuring that the service is turned off and that the proper protective measures are taken to prevent any damage to the service.
2. The Contractor shall be responsible for the protection of all existing underground utilities, including but not limited to water, sewer, gas, electrical, and communication lines. The Contractor shall ensure that all existing utilities are properly marked and protected as required by law.

GRADING NOTES
1. All utilities shall be boxed or boxed and backfilled as required by law. The Contractor shall ensure that all utilities are properly boxed and backfilled.
2. The Contractor shall be responsible for the installation of all new underground utilities, including but not limited to water, sewer, gas, electrical, and communication lines, in accordance with the specifications and plans provided.
