

# RISK ASSESSMENT TOOL FOR HEALTHCARE WORKER CONTACT WITH COVID POSITIVE PERSON (adapted from CDC)

Have you been in direct\* contact with a person with a laboratory-confirmed case of COVID-19? (Direct means person to person, NOT higher-order contacts such as a 'person who met a person who met a person that was sick')

**High/Medium Risk**      **Low Risk**      **No Identifiable Risk**      **Low Risk**      **High/Medium Risk**

\*In absence of specific guidance from local public health professionals this CDC based tool may be used. Specific recommendations may be modified by local authorities.  
 \*\*Healthcare personnel include, but are not limited to, emergency medical service personnel, nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, students and trainees, contractual staff not employed by the healthcare facility, and persons not directly involved in patient care, but who could be exposed to infectious agents than can be transmitted in the healthcare setting (e.g. clerical, dietary, environmental services, laundry, security, engineering and facilities management, administrative, billing, volunteer personnel.)  
 \*\*\*Facemask or respirator; eye protection when positive person was not wearing a cloth face covering or facemask; gown, gloves, eye protection, respirator while performing an aerosol-generating procedure.

|   | High/Medium Risk  | Low Risk  | No Identifiable Risk   |
|---|---|---|--|
