

HOW TO REMEDIATE USING FOCUSED REVIEW

Understanding your results and then taking action to remediate in the areas in which you struggled should be part of your normal routine when using ATI products. Follow the easy steps outlined in this document to get you started. The following information is available:

- [Remediate using Focused Review](#)
- [Select Topics for Remediation](#)
- [Choose a Format](#)

Remediate using Focused Review

Some Proctored and Practice Assessments offer the opportunity to remediate immediately after completing the assessment, using a feature called Focused Review.

To begin remediation, sign in to www.atitesting.com with your Username and Password.

Access results and remediation using the icons below.

1. Click the **My Results** tab.
2. Click either the **Proctored Assessments** tab or the **Practice Assessments** tab to display a list of assessments.
3. Locate the Proctored or Practice Assessment for which you want to create a Focused Review and click the **Create** icon associated with that assessment.

Note: If “N/A” displays in the **Focused Review** column, a Focused Review is not available for that assessment.

Select Topics for Remediation:

- To select specific topics, select the **Select from all missed Topics to Review** option. Select the check box to the left of each topic you want to include in your remediation. The default is to include all missed topics.

Please select the areas Your Focused Review should cover. Below are scores for each section and questions that you missed.

Select from all missed Topics to Review
 Select sections where percent is below %

Select

Include	Topics to Review	Percent Correct
<input checked="" type="checkbox"/>	Safety and Infection Control	0.00%
<input checked="" type="checkbox"/>	Accident/Injury Prevention	0.00%
<input checked="" type="checkbox"/>	Standard Precautions/Transmission-Based Precautions/Surgical Asepsis	0.00%
<input checked="" type="checkbox"/>	Health Promotion and Maintenance	42.86%
<input checked="" type="checkbox"/>	Aging Process	0.00%

- When you are finished with your selections, click **Create Focused Review**.

Choose a Format

When the Focused Review launches, the remediation information is presented in different formats, indicated by the icon appearing to the left of the topic in the tree list.

Note: Remediation Templates will be included for all RN 2010 assessments and PN 2011 assessments.

Legend

Designates a printable PDF document of a specific chapter in the review module. The materials displayed are the actual chapters from your Review Modules that correspond to the question(s) you missed.

Designates a Web page or video content.

The screenshot displays the ATI Focused Review interface. On the left is a tree list titled "ATI FOCUSED REVIEW" with a "View by: Tools" dropdown and a "Click to hide tree list" button. The tree list shows a hierarchy of topics under "RN Nursing Care of Children 2010", including "Safety and Infection Control", "Accident/Injury Prevention", "Seizures: Precautions", "Standard Precautions/Transmission-B...", "Acute Infectious Gastrointestinal D...", "Meningitis and Reye Syndrome: Isola...", and "System Disorder". The "RM NCC RN 8.0 Chp 13" item is highlighted with a red bar. At the bottom of the tree list are buttons for "Instructor", "Student", and "Other", and a "Export checked items () to pdf" button.

The main content area on the right is titled "SEIZURES chapter 13" and features the ATI logo. It contains the following text:

UNIT 2 NURSING CARE OF CHILDREN WITH SYSTEM DISORDERS
 Section Neurosensory Disorders
 Chapter 13 Seizures

Overview

- Seizures are abrupt, abnormal, excessive, and uncontrolled electrical discharges of neurons within the brain that may cause alterations in level of consciousness and/or changes in motor and sensory abilities and/or behavior. Seizures can be abrupt in nature or slow and insidious in onset.
- Epilepsy is the term used to define the medical disorder characterized by chronic, recurring abnormal brain electrical activity.
- The three major categories of seizures include generalized, partial (focal/local), and unclassified (idiopathic).

Assessment

- Risk Factors
 - Genetic predisposition
 - Acute febrile state, particularly among infants and children under the age of 2
 - Head trauma
 - Cerebral edema
 - Abrupt cessation of antiepileptic medications (AEDs)
 - Infection
 - Metabolic disorders, such as hypoglycemia or hyperglycemia
 - Exposure to toxins, such as lead and insecticides
 - Brain tumor
 - Hypoxia

- You can close the Focused Review and return to the material at another time. Click the **Results** tab and then click the appropriate **Focused Review** icon to return to a previously generated Focused Review.
- You can recreate a Focused Review using different criteria. Click the **My Results** tab and then click the appropriate **Recreate** icon to display your selection options.
