

SCOTT COMMUNITY COLLEGE  
RADIOLOGIC TECHNOLOGY PROGRAM

Our Radiologic Technology program is a 2 year program (once you are in the actual program). Once in the actual program the coursework will be taken at the Scott Community College Campus. To get on the Pre-Radiologic Technology roster you just have to apply to the EICC Colleges and declare radiography as your major. You are then a pre-rad student, until you get into the actual program. We have an informational meeting held 2 times a year once in the fall and once in the spring. This session will be scheduled in the evenings at Scott Community College. This meeting explains everything about the program and you will have the opportunity to speak with current radiography students about the program. It is held at 7:00 in room 0104 , Door 1 in the Allied Health building at the Belmont Campus. The entrance criterion has been changed to a point system and grades. **There is no longer a so called waiting list** each year the students must schedule an informal interview to be considered for entrance into the program for the fall. 18 Students are enrolled in the actual rad tech program each fall. The student must sign up and declare Rad Tech as their major and meet all the pre-reqs. I have attached our information brochure for the Radiography program. In the brochure you will see the steps you need to take each January before you can be in the actual program. **You must bring a copy of your transcripts and Teas examination score for your interview appointment to receive 20 additional points.** Please call me if you have any more questions. Thank you for your interest. Jan Jacobs 563-441-4265 The load in the program is a lot and it is much easier to have the pre-req courses out of the way before you actually enter into the program. [Please let me know if you have more questions.](#)
